DR. AYGÜN ŞAHİN

## About Dr. Aygün Sahin

Dr. Ayguen Sahin is a globally recognized scientist, founder of NeuroHyperSensitivity™ (NHS), and a trailblazer in responsible and ethical AI for health and science. With 25+ years of experience, she is a UN award winner, international keynote speaker, and a pioneer in patient-centered cancer care—driving change far beyond the limits of the traditional medical system.

Dr. Sahin's work bridges science, technology, and human experience. Her bold, science-backed insights empower leaders, organizations, and changemakers to innovate ethically, break silos, and solve the toughest challenges in health, science, and technology.

**“Innovation lives beyond broken systems.”**

*— Dr. Aygün Sahin*

## Signature Topics

- **NeuroHyperSensitivity™ (NHS):** The hidden epidemic among high-achievers and leaders—how to identify, manage, and leverage NHS for peak performance and wellbeing.
- **Responsible & Ethical AI in Health/ Science:** Building trust, avoiding costly mistakes, and future-proofing organizations in the age of AI.
- **Pioneering Personalized Cancer Care:** Breaking the medical system's limits—how to champion patient-centered, innovative, and holistic (but not “woo woo”) approaches to cancer care beyond treatment.

DR. AYGÜN ŞAHİN
